Current Position	Fudan University , Shanghai, China Department of Mathematics Postdoctoral Fellow (Mentor: Prof. Lun Zhang)	07/2024 – now
Education	Fudan University , Shanghai, China Ph.D. in Mathematics, supervisor Prof. Engui Fan Thesis title: “ <i>On the long-time asymptotics of the local and nonlocal mKdV equation under the nonzero background</i> ” China University of Mining and Technology , Xuzhou, China B.Sc. in Mathematics, Distinguished Honor Thesis title “ <i>Inverse scattering theory and integrability on several kinds of nonlinear evolution equations</i> ”	09/2019 – 06/2024 09/2015 – 06/2019
Research Interests	Integrable PDEs, Random matrices theory, Determinantal point processes, Orthogonal polynomials, Asymptotic analysis, Riemann-Hilbert (RH) problems, Special functions, Painlevé equations.	
Research Articles	Preprints <ol style="list-style-type: none">Painlevé transcendents in the defocusing mKdV equation with non-zero boundary conditions (with Zhaoyu Wang and Engui Fan) (arXiv:2306.07073) Publications in refereed journals <ol style="list-style-type: none">Soliton resolution and asymptotic stability of N-soliton solutions for the defocusing mKdV equation with finite density type initial data (with Engui Fan and Zechuan Zhang) <i>Physica D: Nonlinear Phenomena</i>, 472 (2025), 134526. (DOI: 10.1016/j.physd.2025.134526) (arXiv: 2108.03650)Transient asymptotics of the modified Camassa-Holm equation (with Yiling Yang and Lun Zhang) <i>Journal of the London Mathematical Society</i>, 110 (2024), e12967. (DOI: 10.1112/jlms.12967) (arXiv: 2308.06950)On the Cauchy problem of defocusing mKdV equation with finite density initial data: long-time asymptotics in soliton-less regions (with Engui Fan and Zechuan Zhang) <i>Journal of Differential Equations</i>, 372 (2023), 55-122. (DOI: 10.1016/j.jde.2023.06.038) (arXiv: 2108.06284)Large-time asymptotics to the focusing nonlocal modified Kortweg-de Vries equation with step-like boundary conditions (with Engui Fan) <i>Studies in Applied Mathematics</i>, 150 (2023), 1217-1273. (DOI: 10.1111/sapm.12568) (arXiv: 2208.01268)Riemann-Hilbert approach for multisoliton solutions of generalized coupled fourth-order nonlinear Schrödinger equations (with Weiqi Peng and Shoufu Tian) <i>Mathematical Methods in the Applied Sciences</i>, 43 (2020), 865-880. (DOI: 10.1002/mma.5964)	
Grants	– Shanghai Post-doctoral Excellence Program Certificate No. 2024100 “ <i>Riemann-Hilbert Method for Several Asymptotic Problems related to Universality from Integrable Systems and Random Matrix Theory</i> ” Role: Host	2024 – 2026

- China Postdoctoral Science Foundation 2024 –2026
Certificate No. 2024M760480
“Semiclassical Asymptotics and Universality for Nonlinear Integrable Shallow Water Wave Systems”
Role: Host

Teaching Activities @ Fudan (2019 – 2026)

- Spring, 2024: TA of Methods of Asymptotic Analysis (MATH630117).
- Fall, 2021: TA of Calculus A (MATH120021.02).
- Spring, 2020: TA of Calculus B (MATH120004.01) (Online).
- Fall, 2019: TA of Calculus B (MATH120003.01).

Scholarships & Awards

2019 – 2024 (Doctorate)

- Graduation with Honors (Shanghai Outstanding Graduate), 2024.
- Scholarship provided by Huatai Securities Technology, 2023.
- Scholarship provided by Pacific Insurance Company, 2022.
- Outstanding Doctoral Candidate Scholarship provided by Fudan University, 2021.
- Doctoral Scholarship of the Year provided by Fudan University, 2019 – 2023.

2015 – 2019 (Undergraduate)

- Outstanding Undergraduates in China University of Mining and Technology, 2019.

Seminars

@ Fudan Integrable Systems and Random Matrix Theory Seminar (2019 – 2026)

- “Fredholm determinants from Schrödinger type equations, and deformation of Tracy-Widom distribution”, Oct, 2024.
- “Biorthogonal measures, polymer partition functions, and random matrices”, April, 2024.
- “Painlevé type asymptotics for the Camassa-Holm equation”, Oct, 2022.
- “A Riemann-Hilbert approach to Fredholm determinants of Hankel composition operators: scalar-valued kernels”, Sept - Oct, 2022.
- “Primitive potentials and bounded solutions of the KdV equation”, Sept. 2022.
- “Soliton V. The gas: Fredholm determinants, analysis and the rapid oscillations behind the kinetic equation”, May - June, 2022.
- “Airy kernel determinant solutions to the KdV equation and integro-differential Painlevé equations”, Mar, 2022.
- “The defocusing nonlinear Schrödinger equation with step-like oscillatory initial data”, Oct, 2022.
- “Momenta spacing distributions in anharmonic and the higher order finite temperature Airy kernel”, Oct, 2022.
- “Long-Time behavior of the non-focusing nonlinear Schrödinger equation – a case study”, April, 2022.
- “On the origins of Riemann-Hilbert problems in mathematics”, Mar, 2022.

Conferences

- The 2nd Workshop on Integrable Systems and Random Matrix Theory, Dongguan, China, 5-17 Jan, 2025. (Talk: “Transient asymptotics of the modified Camassa-Holm equation”)
- Random Matrices and Related Topics, Jeju island, Korea, 6-10 May, 2024.
- The 15th Hemudu Forum on Integrable Systems, Ningbo, China, 24–26 Nov, 2023. (Talk: “Integrable PDEs with nonzero boundary conditions: large-time asymptotics”)
- Foundations of Computational Mathematics 2023 (FoCM2023), Paris, France, 12–21 June, 2023.
- The 13rd Hemudu Forum on Integrable Systems, Ningbo, China, 15 - 17 Oct, 2021.

Academic Visits	– 31/03/2025 – 11/04/2025, Chongqing University, China. (Host: Yiling Yang)
Summer School	– Random Matrix Summer School, University of Michigan, Ann Arbor, USA, 17-28 June, 2024.
Status	China – citizen
Languages	– Chinese (native) – English (fluent)
Computer Skills	\LaTeX , Mathematica, Matlab, HTML, C++, JavaScript
