<b>Current Position</b>	<b>Fudan University</b> , Shanghai, China Department of Mathematics Postdoctoral Fellow (Mentor: Prof. Lun Zhang)	07/2024 – now
<b>Education</b>	<b>Fudan University</b> , Shanghai, China Ph.D. in Mathematics, supervisor Prof. Engui Fan Thesis title: “ <i>On the long-time asymptotics of the local and nonlocal mKdV equation under the nonzero background</i> ”  <b>China University of Mining and Technology</b> , Xuzhou, China B.Sc. in Mathematics, Distinguished Honor Thesis title “ <i>Inverse scattering theory and integrability on several kinds of nonlinear evolution equations</i> ”	09/2019 – 06/2024  09/2015 – 06/2019
<b>Research Interests</b>	Integrable PDEs, Random matrices theory, Determinantal point processes, Orthogonal polynomials, Asymptotic analysis, Riemann-Hilbert (RH) problems, Special functions, Painlevé equations.	
<b>Research Articles</b>	<b>Preprints</b> <ol style="list-style-type: none"><li>Painlevé transcendents in the defocusing mKdV equation with non-zero boundary conditions (with Engui Fan and Zhaoyu Wang) arXiv:2306.07073.</li></ol> <b>Publications in refereed journals</b> <ol style="list-style-type: none"><li>Soliton resolution and asymptotic stability of <math>N</math>-soliton solutions for the defocusing mKdV equation with finite density type initial data (with Engui Fan and Zechuan Zhang) <i>Physica D: Nonlinear Phenomena</i>, 472 (2025), 134526.</li><li>Transient asymptotics of the modified Camassa-Holm equation (with Yiling Yang and Lun Zhang) <i>Journal of the London Mathematical Society</i>, 110 (2024), e12967.</li><li>On the Cauchy problem of defocusing mKdV equation with finite density initial data: long-time asymptotics in soliton-less regions (with Engui Fan and Zechuan Zhang) <i>Journal of Differential Equations</i>, 372 (2023), 55-122.</li><li>Large-time asymptotics to the focusing nonlocal modified Kortweg-de Vries equation with step-like boundary conditions (with Engui Fan) <i>Studies in Applied Mathematics</i>, 150 (2023), 1217-1273.</li><li>Riemann-Hilbert approach for multisoliton solutions of generalized coupled fourth-order nonlinear Schrödinger equations (with Weiqi Peng and Shoufu Tian) <i>Mathematical Methods in the Applied Sciences</i>, 43 (2020), 865-880.</li></ol>	
<b>Grants</b>	<ul style="list-style-type: none"><li>Shanghai Post-doctoral Excellence Program Certificate No. 2024100 “<i>Riemann-Hilbert Method for Several Asymptotic Problems related to Universality from Integrable Systems and Random Matrix Theory</i>” Role: Host</li><li>China Postdoctoral Science Foundation Certificate No. 2024M760480 “<i>Semiclassical Asymptotics and Universality for Nonlinear Integrable Shallow Water Wave Systems</i>” Role: Host</li></ul>	

**Teaching Activities @ Fudan (2019 – 2026)**

- Spring, 2024: TA of Methods of Asymptotic Analysis (MATH630117).
- Fall, 2021: TA of Calculus A (MATH120021.02).
- Spring, 2020: TA of Calculus B (MATH120004.01) (Online).
- Fall, 2019: TA of Calculus B (MATH120003.01).

**Scholarships & Awards****2019 – 2024 (Doctorate)**

- Graduation with Honors (Shanghai Outstanding Graduate), 2024.
- Scholarship provided by Huatai Securities Technology, 2023.
- Scholarship provided by Pacific Insurance Company, 2022.
- Outstanding Doctoral Candidate Scholarship provided by Fudan University, 2021.
- Doctoral Scholarship of the Year provided by Fudan University, 2019 – 2023.

**2015 – 2019 (Undergraduate)**

- Outstanding Undergraduates in China University of Mining and Technology, 2019.

**Seminars****@ Fudan Integrable Systems and Random Matrix Theory Seminar (2019 – 2026)**

- “Fredholm determinants from Schrödinger type equations, and deformation of Tracy-Widom distribution”, Oct, 2024.
- “Biorthogonal measures, polymer partition functions, and random matrices”, April, 2024.
- “Painlevé type asymptotics for the Camassa-Holm equation”, Oct, 2022.
- “A Riemann-Hilbert approach to Fredholm determinants of Hankel composition operators: scalar-valued kernels”, Sept - Oct, 2022.
- “Primitive potentials and bounded solutions of the KdV equation”, Sept. 2022.
- “Soliton V. The gas: Fredholm determinants, analysis and the rapid oscillations behind the kinetic equation”, May - June, 2022.
- “Airy kernel determinant solutions to the KdV equation and integro-differential Painlevé equations”, Mar, 2022.
- “The defocusing nonlinear Schrödinger equation with step-like oscillatory initial data”, Oct, 2022.
- “Momenta spacing distributions in anharmonic and the higher order finite temperature Airy kernel”, Oct, 2022.
- “Long-Time behavior of the non-focusing nonlinear Schrödinger equation – a case study”, April, 2022.
- “On the origins of Riemann-Hilbert problems in mathematics”, Mar, 2022.

**Co-organized Activities**

- (with Lun Zhang) Mini-workshop on Asymptotic Analysis, Fudan University, Shanghai, China, 5th-6th & 9th June, 2025.

**Conferences**

- Universality, Nonlinearity, and Integrability, In honor of Percy Deift, Seoul, Korea, 12-16 May, 2025.
- The 2nd Workshop on Integrable Systems and Random Matrix Theory, Dongguan, China, 5-17 Jan, 2025. (Talk: “Transient asymptotics of the modified Camassa-Holm equation”)
- Random Matrices and Related Topics, Jeju island, Korea, 6-10 May, 2024.
- The 15th Hemudu Forum on Integrable Systems, Ningbo, China, 24–26 Nov, 2023. (Talk: “Integrable PDEs with nonzero boundary conditions: large-time asymptotics”)
- Foundations of Computational Mathematics 2023 (FoCM2023), Paris, France, 12–21 June, 2023.
- The 13rd Hemudu Forum on Integrable Systems, Ningbo, China, 15 - 17 Oct, 2021.

<b>Academic Visits</b>	– 31/03/2025 – 11/04/2025, Chongqing University, China. (Host: Yiling Yang)
<b>Summer School</b>	– Random Matrix Summer School, University of Michigan, Ann Arbor, USA, 17-28 June, 2024.
<b>Status</b>	<b>China</b> – citizen
<b>Languages</b>	– Chinese (native) – English
<b>Computer Skills</b>	$\LaTeX$ , Mathematica, Matlab, HTML, C++, Javascript
